AINTU Token: Advanced Ecosystem

Alntuition features a premium token, called the **AINTU** coin.

Officially launched in December as a BEP20 token. To prevent early-stage market manipulation, Alntuition's internal AI system meticulously tracks all buy and sell transactions within the platform, dynamically adjusting the coin's price in real-time.

Within our secure environment, you can seamlessly buy, sell, swap, and withdraw AINTU for USDT instantly. What's more, you can even leverage your profit gains to purchase investment plans, maximizing your earning potential.

AINTU Token: Advanced Ecosystem

The AI-powered prediction engine is proprietary and highly sensitive. To protect its integrity and shield early users from manipulation, **Alntuition's** private exchange environment will remain in place until certain key milestones are achieved:

Community Growth

A minimum of 100,000 token holders is reached.

Decentralized Distribution

No single wallet holds more than 3% of the total supply.

Market Stability

Daily purchase limits are enforced to ensure steady growth and prevent volatility.

This phased approach ensures fair early access, stable price discovery based on genuine utility - not speculation -and rigorously prevents abuse. Once these security and compliance goals are met, AINTU will proudly go live on the public blockchain.

FOUNDER

The Power of Recurring Commissions

Something very powerful to know, is that **every single time** your referral's plan ends and they re-activate a plan, you are earning a commission from them again and again.

For example, if your referral chooses a 45-day plan and invests \$5,000, \$10,000, or \$50,000, every 45 days you earn a commission. This cycle repeats over and over again with all plans your referrals re-activate.

Many individuals hold multiple plans, and their terms can end at different times. **Imagine having 10 referrals**, all on 30-day plans... commissions from newly activated plans would be earned every 30 days.

THIS IS POWERFUL BEYOND BELIEF!
